

# MPPT SOLAR CHARGE CONTROLLER

## ICharger MPPT 6048

### User Manual

Reminder: The controllers can be installed indoor only.

#### Main Feature

- 60A MPPT solar charge controller
- MPPT technology
- Automatic battery voltage detection for 12V/24V/36V/48V
- 3-stage charging optimizes battery performance
- Overcharge protection, over-temperature protection
- Suitable for battery types such as sealed lead acid, vented gel and lithium battery, etc
- Easy to be mounted

#### Warning and Caution

Be aware that only qualified professionals could install these controllers. Please read all manuals before installing them.

- 1)Keep controller away from water. Don't use wet towel to wipe controller.
- 2)Keep wiring correct, don't reverse wiring. Please pay attention to terminal wiring sequence.
- 3)Keep controller in an environmental temperature from - 20°C~+55°C. Avoid direct sunlight.
- 4)Keep good heat dissipation.
- 5)Use the pure copper wires and connect all polarity correctly.
- 6)The load output is only for DC load less 5A current.
- 7)Please don't set any parameters if you are not professional since the controller can work fine in default condition except lithium battery.

#### Air Circuit Breaker and Wires Requirement

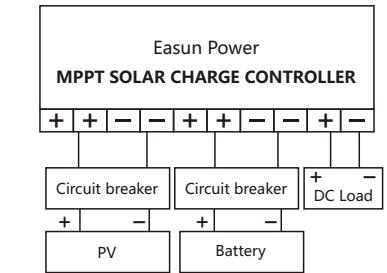

| Models               | ICharger MPPT 6048     |
|----------------------|------------------------|
| Copper wires         | 6mm <sup>2</sup> ×2PCS |
| Air circuit breakers | 100A                   |

#### Wire Connection Sequences

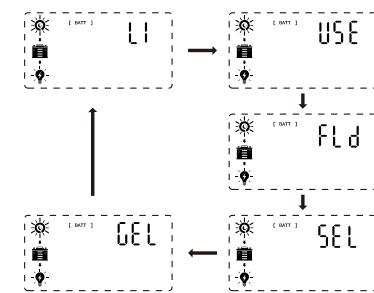

For ICharger MPPT 6048, it's better to connect two wires to two PV+ and another two wires to two PV-. For BAT+ and BAT-, it's same way to connect wires.

#### Installation Steps

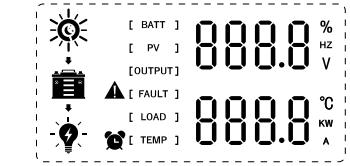

- 1.The battery voltage should be more than 12V, then the controller can boot up. Install air circuit breaker between controller and batteries. Turn off the circuit breaker, then connect batteries to controller with correct polarity.
- 2.Install air circuit breaker between controller and PV modules. Turn off the circuit breaker, and ensure the PV polarity correct, then connect wires between PV modules and controller.
- 3.Turn on the air circuit breaker between controller and batteries.
- 4.Turn on the air circuit breaker between controller and PV modules.

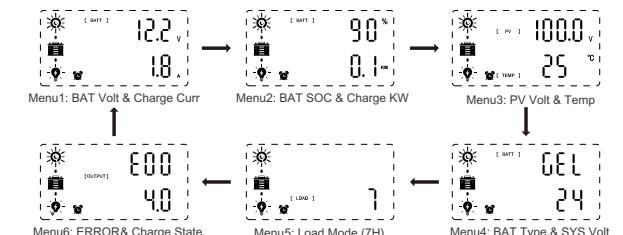

#### 2.Battery Type Setting

#### LCD Display Indication

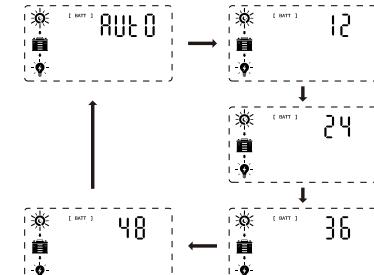

#### 1.Display Introduction

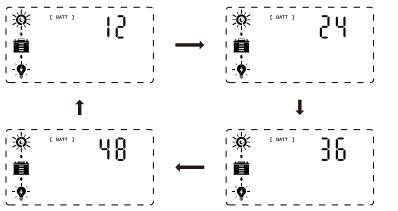

#### 3.System Voltage Setting

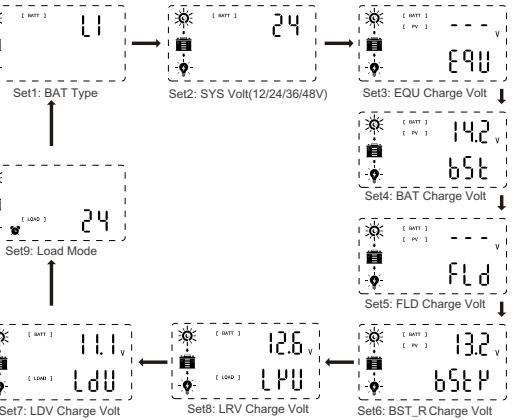

##### (1)Battery Type = USE

### (2)Battery Type = LI

### (2)Battery Type = LI

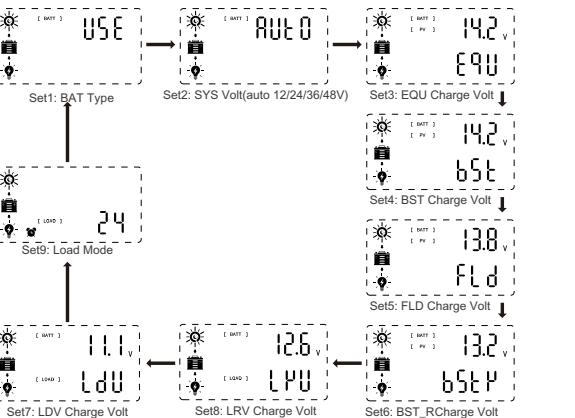

### (3)Battery Type = SEL/GEL/FLD

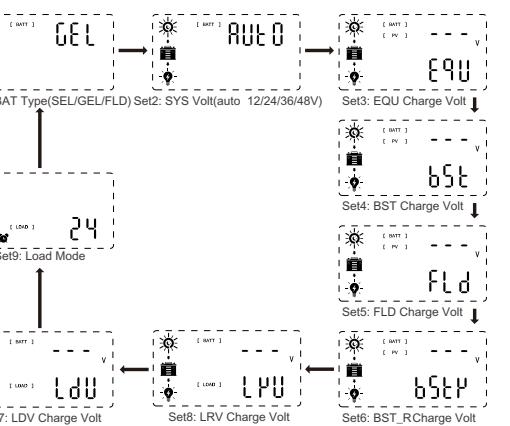

### 4. Parameter Setting

#### (1)Battery Type = USE

#### (3)Battery Type = SEL/GEL/FLD

## Press Key Operation

| Function Key | System Mode | Operation   | Operation Indication |
|--------------|-------------|-------------|----------------------|
|              | View Mode   | Long Press  | Enter SET mode       |
|              | View Mode   | Short Press | Screen page down     |
|              | View Mode   | Short Press | Screen page up       |
|              | View Mode   | Short Press | -                    |

## Working Mode

| Code | Working Mode            |
|------|-------------------------|
| 3.0  | Night mode, no charging |
| 4.0  | MPPT mode               |
| 7.0  | Absorption mode         |
| 8.0  | Floating mode           |

## Manual Setting

Caution! All steps must be carried out when the PV modules are disconnected to controller.

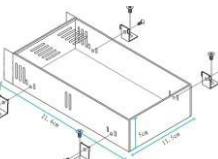

## Batteries charge voltage reference

| Battery Type | System Volt       | EQU            | BST            | FLD   | BST_R | LRV            | LDV   |
|--------------|-------------------|----------------|----------------|-------|-------|----------------|-------|
| GEL          | Auto              | ---            | 14.2V          | 13.8V | 13.2V | 12.6V          | 11.1V |
| SEL          | Auto              | 14.6V          | 14.4V          | 13.8V | 13.2V | 12.6V          | 11.1V |
| FLD          | Auto              | 14.8V          | 14.6V          | 13.8V | 13.2V | 12.6V          | 11.1V |
| USE          | Auto/12/24 /36/48 | Defined by GEL |                |       |       |                |       |
| LI           | 12/24/36/48       | ---            | Defined by GEL | ---   | ---   | Defined by GEL |       |

## Error Code

| Code | Error                |
|------|----------------------|
| E00  | No Error             |
| E01  | Battery over voltage |
| E02  | PV over voltage      |
| E08  | Over-discharge       |
| E20  | Device over heating  |

## Dimension

Notes: Please use our screws only since it may damage the internal PCB if using other screws. Please use proper torque to push the screws into casing since it may damage the internal PCB by strong torque.

## Basic Parameter

| Item                                  | Parameter   |
|---------------------------------------|---|
| Models                                | ICharger MPPT 6048  |
| Charging mode                         | 3-stage: constant current(MPPT), constant voltage, floating   |
| System voltage                        | 12/24/36/48/Auto  |
| Max PV input power                    | 720W/12V; 1440W/24V<br>2160W/36V; 2880W/48V   |
| Max PV input voltage                  | 180 Voc   |
| Battery voltage automatic recognition | 12V system (DC8.7V-DC15.5V)<br>24V system (DC16V-DC31V)<br>36V system (DC33V-DC41V)<br>48V system (DC42V-DC64V) |
| Overcharging protection voltage       | 12V system (16V)<br>24V system (32V)<br>36V system (48V)<br>48V system (64V)                                    |
| Limited current protection            | 61A   |
| Max efficiency                        | ≥98.1%  |
| PV utilization                        | ≥99%  |
| Auto Temperature Compensation         | -3mV/2V/°C  |
| Protection Function                   |   |
| Temperature protection                | 80°C  |
| Fan-on temperature                    | >45°C   |
| Fan-off temperature                   | <40°C   |
| Properties                            |   |
| Size (mm)                             | 214x115x50  |
| Net weight (Kg)                       | 1.1   |
| Gross weight (Kg)                     | 1.2   |
| Electromagnetic compatibility         | Accord to EN61000, EN55022, En55024   |
| Enclosure                             | IP21  |
| Environmental temperature             | -20°C ~ +55°C   |
| Storage temperature                   | -40°C ~ +75°C   |
